2 of 4 people found the following review helpful. center lumber sales book By Steven J. Williams I think the book is a very good one for someone buying moulding from center lumber company, it has no profiles at all of the most popular moulding's sold in the united states that I could find, that was the main reason I purchased the book, but it does show you some very nice profiles, if you want to make them, or order from center lumber co. I kinda wasted my money as far as I'm concerned. 1 of 1 people found the following review helpful. fantastic book for the handtool woodworker. By K. Clark If you make custom moldings and picture frames using hollows and rounds and snipes bills, this book is almost

priceless. 1800 molding profiles drawn to scale! If you don't use handtools and don't know what I'm talking about, you will probably be less interested.
