The photographs are beautiful. While many of the decks pictured are elaborate and much grander than ours will be, they sparked ideas. I took components, like the pergolas and privacy screens, and incorporated them into our own deck design. We changed our minds on how the stairways will be built because we saw others we liked better. The information about composite decking helped change my mind about using it for our deck. The book is now with our builder who has designed many decks in our area and is always looking for new ideas and new materials. He's especially interested in the how-to portion of the book and any possible new ways to construct a deck. 0 of 0 people found the following review helpful. Interesting, hits all deck a
