Dino Rondic : Comprehensive guide to building Greenhouses before purchasing it in order to gage whether or not it would be worth my time, and all praised Comprehensive guide to building Greenhouses:

Greenhouses are sources of continuous throughout-a-year food production. They provide ideal conditions for growing plants for own or commercial use. This book is a guide that shows how to plan, organize resources and build your own greenhouse. It contains a step by step illustrated guide for building small size cold frames, small to large scale PVC greenhouses and glasshouses.
