Construction Drawings and Details for Interiors serves as the essential reference for designers preparing interior construction documents, explaining how to do a new construction, remodeling, or installation project. In a highly visual format, the book covers drafting fundamentals and conventions; drawing types, plans, and schedules; and computer-aided design (CAD). With expanded coverage of the preparation and communication of construction documents in digital formats, drawing interior perspectives, and more, the text also serves as an invaluable study reference for the contract documents section of the NCIDQ exam. A new companion Web Site supplies template grids for schedules and contract documents for practice exercises.

From the Inside FlapConstruction Drawings and Details for Interiors Architecture/Interior Design "Well thought out and addresses almost all of the major topics that interior designers need. I was elated with its comprehensiveness." - Martin Zelnik As interior designers assume an expanding role coordinating interior projects, producing construction

drawings has become even more integral to their job. *Construction Drawings and Details for Interiors: Basic Skills, Second Edition*, provides interior designers with the information and skills they need to create construction documents that clearly communicate the interior space of new construction, remodeling, or installation projects. In a highly visual format, complete with the authors' drawings as well as those from practicing professionals, this book acquaints the reader with drafting fundamentals and conventions; drawing types, plans, and schedules; and computer-aided design (CAD). The book is organized in two parts: Part One discusses graphic language as a communication tool in design and architecture Part Two details the construction document process, from overall concepts and organization to current practices and topics such as floor plans, sections, elevations, millwork, schedules, finish and furniture plans, lighting and electrical plans, HVAC and plumbing plans, and preparing specifications This updated Second Edition features expanded coverage of the preparation and communication of construction documents in digital formats; drawing interior wall and partition types; field measuring existing buildings and interiors; as-built drawings; demolition plans; fire and life safety plans; sustainability and LEED standards; as well as a new companion Web site supplying template grids for schedules and contract documents for practice exercises. An essential reference for designers and students preparing interior construction documents, *Construction Drawings and Details for Interiors: Basic Skills, Second Edition* will also serve as a valuable study reference for the contract documents section of the NCIDQ exam.
