.But now I live on the rugged West coast. Then, when I read her book ,I related to her greatly ; as I too still go in the garden early dawn; in my robe and cup of coffee ;to watch the sun rise and hear the lovely birds welcome each day; Sun or Rain . I recommend this book to the depressed and those lacking faith in all that is still good in life . As it inspires hope for today and the future .1 of 1 people found the following review helpful. country living gardener A Blessing of ToadsBy Judith A DarkoSharon Lovejoy shared a lot of knowledge about nature with her observations of different animals, plants and even the smallest insects. Using the book as a guide, a person can learn ways to attract more birds, beneficial insects and friendly wildlife to their home yards and surrounding neighborhoods. Lots of very helpful information in this book and most is a lot of easy to follow directions or doing with a slight amount of work. Very good. I purchased 5 and have been giving them as gifts.2 of 2 people found the following review helpful. For Nature LoversBy ValarieThe author shares her acute observations of the life she finds in and around her backyard. There is so much more going on "out there" than one might imagine. The book is set up in short chapters that offer tips on how best to nourish your yard so it provides a natural habitat for all those living beings in your yard. A very sweet book.

Essays and illustrations from the award-winning column, Hearts Ease.Since the very first issue of Country Living Gardener, writer, artist, and naturalist Sharon Lovejoy has produced the award-winning Hearts Ease column for the magazine. Through this collection of delightful essays and beautiful illustrations, she shares with her readers the boundless joys of a country garden. Lovejoy has chosen to focus on animal life in the garden, including hummingbirds, caterpillars, and dragonflies, but her informative and witty prose also covers traditional plant care. The very titles of her sketches convey pleasure in the vibrant country landscape and the life that teems within it: The Bumble Bee Rumba, Faeries in the Fuschias (sphinx moths), Holiday Feasts for the Birds and the Beasts, and Conversations with Sunflowers. This compilation truly isto borrow another of her titlesSomething to Crow About. Advertising in Country Living Gardener
