Apryl Uncapher, Cleo Woelfle-Erskine : Creating Rain Gardens: Capturing the Rain for Your Own Water-Efficient Garden before purchasing it in order to gage whether or not it would be worth my time, and all praised Creating Rain Gardens: Capturing the Rain for Your Own Water-Efficient Garden:

1 of 1 people found the following review helpful. Life sustainingBy Joel've purchased several books on sustainable living. Some on solar energy, others on gardening, landscape design, rainwater harvesting, and on greywater. Creating Rain Gardens is among the best in my library, both for guidance and instruction. I currently have a rooftop PV system, gutters, and a rainwater harvesting system with a capacity of over 10k-gal installed on my residential property in the Mojave Desert. Here we average about 4-inches of rain per year and we dont take water for granted. When it rains here, it pours. We can received 2 to 3 inches of rain in an hour, and then nothing for months. Capturing every drop we can is life sustaining. This book provides detailed instruction on how to choose, design, build, plant, and maintain your own rain garden exceptionally well. I certainly recommend it.3 of 3 people found the following review helpful. Great book!By Nancy A. North-gatesThis book gives comprehensive information on how to plan and build rain gardens. Two approaches are included - one can use the directions for the average person or using the information in the side

bars use the more mathematical/engineering methods. I have this on Kindle and then bought a hard copy. 3 of 3 people found the following review helpful. Creating Rain Gardens.....Unique Experience in writingBy Paul GThis book provides a step by step introduction and creation of an unique solution to "run off problems". Of a great help to me!!

Homeowners spend hundreds of dollars watering their yard, but there is an easy way to save money and resourcesrain gardening. But what is it? As simple as collecting rain to reuse in front and backyards. Creating Rain Gardens is a comprehensive book for the DIY-er, covering everything from rain barrels to simple living roofs, permeable patios, and other low-tech affordable ways to save water in the garden. Water conservation experts Cleo Woelfle-Erskine and Apryl Uncapher walk homeowners through the process, with step-by-step instructions for designing and building swales, French drains, rain gardens, and ephemeral pondsthe building blocks of rain-catching gardens. From soil preparation, planting, troubleshooting, and maintenance, to selecting palettes of water-loving plants that provide four-season interest and a habitat for wildlife, Creating Rain Gardens covers everything a gardener needs to create a beautiful rain garden at home.

The book is a beautifully-written practical guide to planning and creating your own rain garden.Green Upgrader This is a hard-working book. Its full of plans, diagrams, checklists, case studies, and solid, practical advice.Garden Green Angels Blog
