Peter H. Dernoeden : **Creeping Bentgrass Management: Summer Stresses, Weeds and Selected Maladies** before purchasing it in order to gage whether or not it would be worth my time, and all praised Creeping Bentgrass Management: Summer Stresses, Weeds and Selected Maladies:

Creeping Bentgrass Management presents a difficult management problem throughout the summer season. This complex dilemma is related to numerous and often interrelated factors such as: extreme air and soil temperatures, drought or excessively wet soils, dense thatch or organic mats, mechanical and other physical stresses, improper management practices, the misuse of chemicals, and other physical stresses. The goal of this useful manual--complete with helpful color photographs--is to give golf course superintendents practical tools to better understand the many stress factors that contribute to the creeping bentgrass decline complex. It will help you pinpoint problems, and implement cultural and chemical solutions to maintain the integrity of your course.
