Natch Greyes : Cultivating Carnivorous Plants before purchasing it in order to gauge whether or not it would be worth my time, and all praised Cultivating Carnivorous Plants:

0 of 0 people found the following review helpful. Great book on carnivorous plants By Mark A. Bauer Excellent book. Covers entire spectrum of plants and cultivation. Detailed descriptions and information. Well-known author. Will be helpful as I try to cultivate plants. Well known author. 3 of 4 people found the following review helpful. Worth adding to your carnivorous plant library. By J. Abramson For me it is not a comparison of books as this field is so new we glean new information from each book. I especially like the way the author organizes the information which makes the format useful. I appreciated the clear photos and planting information. 0 of 1 people found the following review helpful. Five Stars By Michael Norton I really like this book. Someday I will have some. No, place right now.

Cultivating Carnivorous Plants is the guide for growing: Aldrovanda Brocchinia Catopsis Cephalotus Darlingtonia Dionaea Drosera Drosophyllum Genlisea Heliamphora Nepenthes Pinguicula Roridula Sarracenia Triphyophyllum

Utricularia It contains an array of easy to understand guides to growing a variety of carnivorous plants in a number of different conditions.

About the Author Natch Greyes is a New Hampshire Attorney and carnivorous plant collector. His blog, Natch Greyes Carnivorous Plants, is one of the most read blogs about carnivorous plants. As an active member of the New England Carnivorous Plant Society, he has facilitated efforts to revitalize the University of New Hampshire's carnivorous plant collection.
