Alexander Laurie, D.C. Kiplinger : Culture of Greenhouse Roses (Bulletin 654 / Ohio Agricultural Experiment Station) before purchasing it in order to gage whether or not it would be worth my time, and all praised Culture of Greenhouse Roses (Bulletin 654 / Ohio Agricultural Experiment Station):

This bulletin is intended to cover as completely as possible the research work done by the authors over a period of 10 years and at the same time to provide specific instructions for the culture of this important crop. Some financial assistance was rendered by Roses Incorporated. The greenhouse rose production in the U.S. is covered by approximately 30 million square feet of glass, housing nearly 20 million plants. The total production is about 400 million roses per year, with present day returns estimated at \$40 million at wholesale prices.
