Wendy Baker : Curtain Fabric Selector before purchasing it in order to gage whether or not it would be worth my time, and all praised Curtain Fabric Selector:

0 of 1 people found the following review helpful. Very helpfulBy DEKI found this book very helpful. It helped me see the differences between styles of curtains, and then, by having the pictures of the many, many fabric choices in the directory below the line drawings of the curtains, I was able to see the tremendous impact of the different patterns. For example, I could easily see the difference between "town blues" and "country reds" for any given style. It is a great visualization tool, and could help prevent some expensive mistakes. If I'd had a similar book for upholstery, perhaps I wouldn't have wasted so much money reupholstering that darn green plaid couch! The swatch looked great, but oh my, talk about impact!3 of 3 people found the following review helpful. Deserves less than a starBy Vivienne AtherThis

book was a mega disappointment. Its binding was of inferior quality and didn't provide any 'actual swatches'; just photocopies of fabrics...you can get that from any fabric website for free. Putting a square patterned paper next to a diagram of a window treatment do not work with trying to picture how the actual thing will look. You're better off closing your eyes and visualizing on your own. If you're totally at a loss for ideas, many other curtain books are much better than this waste of paper.

Choosing your curtain design and fabrics couldn't be simpler with this unique split-format Curtain and Fabric Selector . There are over 600 fabrics swatches, all in colour groups - to make it easier to select your favourite colour and pattern - and 150 stunning curtain and blind designs from sophisticated swags and tails to minimalist translucent panels. This book offers instant inspiration whether you are looking for window treatments for an airy loft space or a cosy farmhouse kitchen. In the first section you will find some advice on how to measure your windows correctly for curtains and some useful tips about selecting the right design for that particular window. A selection of poles and finials, trimmings and other essential finishing touches will help you create a professional co-ordinated look for your home, whether it is in town or in the country.

About the Author Wendy Baker has been a teacher within all levels of education. She is now retired and works as a research assistant. Her interests and concerns are in contemporary European philosophy, psychoanalysis and theology.
