By ShawnTGA Subcool rules having info on most of the strains and stories behind some is key to anyone wanting to breed with TGA Genetics gear. Not a great read but some very good info and awesome pics. Subcool has high standards so picking a TGA strain is almost full proof packs of 5 usually give me 5 great phenos and very very very high female to male ratio, also I've never had a bad plant out of 55 beans 100% (55 of 55) even some I had stored at room temp for 17 months were fresh as new. Other breeders I can't say the same about so I highly recommend this book for sativa Dom hybrids and some 50/50 hybrids. The Vortex, cheese quake, chernybol, crazy Train, Time Wreck, Brian Berry cough(new), jacks cleaner BX, ace of spades, Jillybean, space queen or Jill, Jack the Ripper, ripped Bubba, plush berry, querkle, space dawg and Conspiracy kush or Jesus OG all rate 8-10 months a 1/10 scale overall and biggest knock or only one is yields. The great ones never yield they produce medication (THC, CBD, CBN etc..) good medication guaranteed depression gone and more. 2 of 2 people found the following review helpful. Great book subcool!! By dan lewis Great book with some old school strains. Gives subs journal on the strain and the information on it. There's about 50-60 strains he features on there and a lot are legit and many agree. It's not a horrible book someone who says that just didn't get what they were looking for. 0 of 0 people found the following review helpful. Interesting By Dave Interesting read. I learned a little about the breeding process and specifically how subcool does his breeding. Doesn't seem like rocket science. What I like is he breeds in less than ideal conditions to breed tougher genetics than other breeders who "dial" everything in perfectly. I would trust his seeds over others based on his breeding techniques. If your interested in cannabis I recommend this easy short read into some strains of subcool. Cheers!

With DANK 2.0, a master breeder shares his passion and enjoyment of an amazing plant. As the master breeder for TGAgenetics, author and photographer Subcool is the man responsible for such award-winning strains as Vortex , Space Bomb, and Jack the Ripper. Subcool breeds for distinctive color, flavors, and highs. His varieties come in unusual tones of red, pink, and purple, and the ripe buds glisten with trichomesglands filled to capacity with intoxicating THC and other cannabinoids. "Dank" is simply the very best marijuana, grown to perfection. DANK 2.0 the book is a visual story of marijuana buds at their ripest, stickiest best. Ed Rosenthal refers to Subcools photographs as "Pot Porn."

"Subcool revamps and updates his first book DANK with the new DANK 2.0. . . . Featuring incredible photos by Subby himself accompany vivid descriptions of both the strains' attributes and how he went about creating them, DANK 2.0 explains the entire process of creating your own pot variety from start to finish. Learn how choices are made from large selections of breeding stock to produce the most potent, aromatic , and tasty cannabis available. Rarely are these highly-guarded trade secrets revealed, yet Subcool goes into great detail on his decision-making process and how it all went down. From seed to bud, Sub describes and portrays the glorious ganja plants derived from years of careful selection of elite genetics. Colorful and full of fascinating inside info, DANK 2.0 takes the cannabis coffee table book to the next level." Danny Danko, High Times
