And who is the so-called "style maker," Christy Ferer? Has anyone heard of her?22 of 23 people found the following review helpful. A couple of ideas, but not as much as I'd hopedBy A CustomerI was somewhat disappointed in this book. It had a few specific decorating ideas, and clear enough instructions (there were directions even for the laughably easy ideas, like hanging frames on a wall), but for the most part, the projects didn't really appeal to me. They seemed a little narrow in range--there weren't so many overall decorating ideas, but more "do what I do" projects. The pictures weren't illustrative enough of the projects in some cases (only one pic and page per suggestion), and I didn't like the way it was arranged, with a number of idea pictures, and the instructions at the end of a "chapter." Additionally, though it's supposed to be "Decorating on a dime," there were projects that called for such things as 13 yards of raw silk. My dime is apparently not the same as the author's.I did get a couple of ideas from this book,-- the end tables made of glass and copper plumber's pipe were clever--but on the whole, I found the book a little fluffy and without substance, and not as inspirational as I expected.4 of 6 people found the following review helpful. A Must Have!!By coffee\_slut@msn.comThis decorating book gives practical and innovative ideas to decorate on a budget. There are step-by-step directions and great pictures throughout. The best part is the resource guide, it gives the name and address to contact for information, catalogs and merchandise.

Don't pass this one up!!

A lavish guide book that provides easy instructions for decorating in style--and on a budget--Decorating on a Dime lists all the necessary tools and supplies, a timetable, and step-by-step directions for success. Full-color photos of the finished results serve to inspire readers toward their goals.

.com Christy Ferer has written a truly eye-opening guide to achieving major-league style on a tight budget. Her burlap-and-silk curtains, glass-topped tables made from copper plumbing pipe, and feather-trimmed wastebaskets are the kind of accessories that rich people shell out big bucks for (but smart ones can make for next to nothing), and her solutions to the problems of imperfect floors, wall spots, plumbing that needs disguising, and too-small spaces are wildly creative.
