By Helen Behd
This is my bible of cheap, chic, easy, unique, and practical ideas for interior design. Especially geared for those big small spaces this book gives you ideas on using all kinds of materials, (most of which are easily available at hardware stores, garage sale, re-purposed, free or nearly free,) These ideas can be tweaked and jazzed up according to taste, budget available artistic carpentry talent. Brilliant SIMPLE ideas for: Easy to build furniture, room dividers, bookcases, etc.. Most people with little or no carpentry skills can do it. This book is a must for anyone interested in living chic, cheap, utilitarian artsy.

By Cat Martin
If you are living in a small space and/or just starting out with little cash, this is an excellent book to spark ideas on how to maximize both your space and the dollars you spend on it. I love the banquets as she refers to them with hidden storage, but there are so many ideas it's worth flipping through all the pages. You may spot one or two ideas just right for your space!
