This book describes the design and development of 14 denser than typical projects that range from single-family subdivisions to downtown high-rise apartments, illustrating new urbanism, transit-oriented development, mixed-income and mixed-use housing types, urban infill, and adaptive use.

From the PublisherEspecially useful for architects, planners, builders, and developers, the case studies in this book show how smart growth can pay off economically. They also reveal trends and standards for developing projects that provide a sense of place, use land efficiently without compromising livability, and that can pass the twin tests of governmental approval and marketability.About the AuthorSteven Fader, AIA, LEED AP, is a Los Angeles-based architect and writer. His firm specializes in educational and institutional design, renovation, and historic preservation, and residential design. Foreword by Vincent Scully.
