**Aurora Fernández Per, Javier Mozas, Javier Arpa : Density is Home: Housing By a+t Research Group (Spanish and English Edition)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Density is Home: Housing By a+t Research Group (Spanish and English Edition):

3 of 3 people found the following review helpful. The worst a+t book in my shelfBy Victor Sanchez MadrigalThe Floor plans and most of the drawings are shown in some sort of perspective view which is really hard to read and very confusing. There is a great lack of images and text to set a background to fully understand the projects.I have bought other books from a+t and they are absolutely great and handy. This was a total disappointment and overall a waste of money.0 of 0 people found the following review helpful. The book deals several case study of housing projects in ...By

James Yuntae Lee The book deals several case study of housing projects in terms of density related urban context, functional, and social problem solution. It describes as much detail as possible with drawings and photos. It explains housing projects in a wide and detail point of view. We can use this book for real reference how to build and design for the similar situation coming future.

Our home is now in a city which is compact and mixed which grows inwards and is renewed. We are returning to the historic city, to the modern city, to the post-industrial city. We are regenerating the narrow plots of the medieval urban grids, the 19th century urban extensions and the new-old neighbourhoods of the 60s. Density is Home echoes these types of city - dispersed, expansive, modern, the core of the city and the recycled city- through 37 projects of collective housing. With projects by Aires Mateus, Marlies Rohmer, Batlle i Roig, Chiba Manabu, Lacaton Vasal, and Diener Diener amongst many others.

'The theme of context in this book is a nice and appropriate change of pace - in relation to the other Density books -, elevating the importance of the architects' responses to their surroundings, linking apartments to the various urban situations that are being filled in as people move back into the city', John Hill, A Weekly Dose of Architecture 'Density Is Home es la ms reciente entrega del grupo de investigacin de la editorial a+t, en la cual nos presentan un interesante estudio acerca de la transformacin de los nuevos tejidos urbanos y sus tipologas de viviendas multifamiliares', Edgargonzalez.com 'Like the rest of the series, which we again recommend every book and magazine, each of the thirty-seven projects is presented in an impressive presentation showing facts about the project itself and its environment along with great graphics that show programs, sections, Axonometric projections and of course images of the built project', ArcHeb About the Author a+t research group is made up of the journalist Aurora Fernndez Per and the architects Javier Mozas and Javier Arpa. Its aim is to spread their research on collective housing, density, mixed uses and public space through a+t architecture publishers. The architect Alex S. Ollero is in charge of the illustrations and the design concept.
