Freda Cox : Designing and Creating a Mediterranean Garden before purchasing it in order to gauge whether or not it would be worth my time, and all praised Designing and Creating a Mediterranean Garden:

4 of 4 people found the following review helpful. Just What I Was Looking For By Jim D. While the focus of this gardening book is designing and creating a Mediterranean garden in a northern climate (i.e.: England), I found it to be very informative, instructive and beautifully illustrated. It met my expectations for a) describing various designs and features of the Mediterranean garden, b) identifying various Mediterranean plants and their requirements, c) illustrating various groupings for different effects, and d) offering planting instructions. I'm looking forward to implementing much of what I learned from this book in my own garden. 5 of 5 people found the following review helpful. Great Book! By TX Vaquero Riding the Gas Range Originally published in Great Britain and printed in full colour in Malaysia, this is a fabulous book. It would be a great addition to most any gardener's bookshelf who wants to learn how to plan and develop a water-thrifty, easy-to-care-for Mediterranean inspired landscape. Heavily illustrated

with blooming plants, both alone and in the landscape, the author, Freda Cox, presents a wealth of information adaptable to your own location, soil and weather conditions, water restrictions and budget. Highly recommended for both the novice and master gardener. 0 of 0 people found the following review helpful. Five Stars
By Bruce MacKay
Great ideas for our garden

How often have you wished you could create a little corner of the Mediterranean in your own garden? Or wished that you could cut back on the time-consuming chore of watering? Or thought about growing Mediterranean plants but feared they couldn't survive in a cooler, less hospitable climate? By following the advice in this photo-filled guide, you can achieve all this and more. *Designing and Creating a Mediterranean Garden* takes you from the planning stages, through dealing with lawns, patios, and terraces, to landscaping and adding those touches of style from Italy, France, Greece, or Spain. This is an outstanding guide, featuring an A-Z of plants, a wealth of expert advice, and 400 color photos and drawings.
