Three Stars By Khoa Nguyen I am ok with product and services. 1 of 1 people found the following review helpful. Review of Detail in Contemporary Lighting Design By A. Robinson This book is filled with very interesting recent (2012) lighting projects of many types and includes both details of construction and a CADD ready disk. I highly recommend it.

Lighting is a key feature of almost all interiors but it is often treated in a rather superficial manner in most books. This volume features more than 40 recent international projects where the lighting is the defining design feature. Each project includes detailed plans, diagrams, sketches, and CAD visuals to demonstrate the lighting techniques involved. These are accompanied by an explanatory text that looks at the original brief, the design concept, and the detailed specification of the light fittings. A bonus CD includes technical drawings from the book. This book will be an invaluable resource for professional interior designers and architects in what is a fast-changing field.

About the Author Jill Entwistle was editor of Light magazine for several years and is the author of a number of books on lighting, including *Designing with Light: Bars and Clubs* and *Designing with Light: Hotels*.
