D Cornwall : Disposal of Waste Resulting from Arsenic Removal Processes (Awwarf Report S) before purchasing it in order to gage whether or not it would be worth my time, and all praised Disposal of Waste Resulting from Arsenic Removal Processes (Awwarf Report S):

There are a number of treatment techniques that can effectively remove arsenic from drinking water. It is essential for utilities that are in the process of selecting an arsenic removal treatment technology to also identify the types of residuals that would be generated, their expected arsenic concentrations, and pre-treatment strategies that would be

required prior to final disposal. This document provides utility guidelines for disposal of residuals containing elevated concentrations of arsenic.
