Miranda Beaufort, Jane Nicholas : Easy Gardening: Recipes for Successful Planting before purchasing it in order to gage whether or not it would be worth my time, and all praised Easy Gardening: Recipes for Successful Planting:

0 of 0 people found the following review helpful. Great book for color visualization. By Flowers Flourish I liked the format of this book and its visual appeal. Each garden is presented with a full page of pictures showing the bloom or foliage colors of each plant selected for that "recipe". The dynamics of color and form are stunning. The written plant descriptions are very detailed. This book could be very helpful to all beginning gardeners as well as established landscapers. It's very helpful for visualizing complex color arrangements. However, the book does highlight plants available in England and Europe, and based on my experience in Ohio, some of those plants are not readily available in US nurseries. Happily, it is not difficult to duplicate the plan with a different plant using the great descriptions. 0 of 1 people found the following review helpful. Great Book By Shena KI love this book. There are mulitple plans, and they are easy to follow. There is information on how to care for the plants after you plant them. You won't be disappointed with this book.

Many gardeners especially novices are burdened by questions of what to plant where. Which plants will look good with each other? How to ensure that plants will be attractive for more than a few weeks of the year? And what to plant in a difficult spot? *Easy Gardening* completely removes the pressure of making such decisions, showing readers how successful planting can be easy with the use of simple planting suggestions for a variety of garden situations. The authors recommend perfect plants for different places, from a hot, sunny, south-facing corner to a dry, dark, shady area. For each situation the planting is presented as a recipe, with a list of which plants are needed and how many of each to order. Color photographs illustrate the individual plants, and a planting plan shows the layout of the garden and the positioning of the plants.

About the Author The Duchess of Beaufort and Jane Nicholas have worked together since 1980. During that time they have designed numerous gardens, and they have continued to visit and oversee the development of many of these after planting. They have evolved a style that combines homage to traditional English gardening with the sophistication of modern plants and techniques. John Glover's garden photography has appeared in many books and articles around the world. He has won the Garden Writers' Association award for Best Calendar Photography three times (1999, 2000 and 2001), the Garden Writers' Guild Features Photographer of the Year (2002) and the Garden Writers' Association Garden Globe Award for Best Photography (2003).
