Editors of Fine Homebuilding : Energy-Efficient Building (Best of Fine Homebuilding) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Energy-Efficient Building (Best of Fine Homebuilding):

0 of 0 people found the following review helpful. Good for general info on weatherizing your home By Wheel This book is about 15 years old and is somewhat outdated on a few issues but it still provides info that is still in use today. I bought at used price and found some needed information very enlightening. Good for general info on weatherizing your home. 0 of 0 people found the following review helpful. Helpful By Anne Nonimus helped build safer shop with less drafts and more energy savings. 0 of 1 people found the following review helpful. Energy -Efficient Building (Best of Fine Homebuilding) By Sheri Shavlik A book on building homes in an efficient way of building a home. How to build a home in good ways.

Although energy costs are near an all-time low, modern energy efficiency offers more than just savings: It offers comfort. With the help of this book, homeowners and builders can build lasting comfort into their homes -- and save money. This new addition to the best-selling Best of Fine Homebuilding series brings together 29 of the best articles from Fine Homebuilding magazine that cover topics from choosing ductwork and housewrap to building more efficient fireplaces and storm windows. The articles detail specific projects home-owners or builders can do to improve the energy efficiency of a traditional home. Over 200 photos and 50 color illustrations make concepts and product comparisons easy to understand, even for non-professionals. All of the articles are intended to solve common home energy problem: such as those associated with doors, skylights, water heaters, and heating systems. Energy-Efficient Building is an essential reference for homeowners and builders alike and invaluable to anyone building a new home.
