David Thorpe : Energy Management in Buildings: The Earthscan Expert Guide before purchasing it in order to gage whether or not it would be worth my time, and all praised Energy Management in Buildings: The Earthscan Expert Guide:

0 of 0 people found the following review helpful. Five StarsBy TomasGood product

The role of the energy manager has evolved significantly as the task of cutting greenhouse gas emissions from buildings has become increasingly important. Managers are now technical experts, negotiators, construction project managers, procurement specialists, efficiency advocates and often provide energy services to others. This comprehensive book covers how to: conduct an energy audit plan a monitoring and verification strategy make any energy-saving campaign successful evaluate and make the financial case for energy-saving measures make use of free

energy for lighting and managing heat loss and gain. It also contains special chapters on: ventilation, heating and cooling demand management through automated systems lighting most requirements of industrial facilities regulatory requirements in Britain, Europe and the United States the use of smart meters and monitoring how to achieve zero energy buildings the use of renewable energy. For all professional energy, building and facilities managers, energy consultants, students, trainees and academics. It takes the reader from basic concepts to the latest advanced thinking, with principles applicable anywhere in the world and in any climate. "

'Provides a complete introduction to the subject of energy management, and will, I'm sure, be useful to both trainees and novices and industry veterans seeking an updating of their knowledge with the latest developments. David is a clear writer, who manages to make the most technical subjects accessible. He has a clear overview of all sectors and technologies.' - Nick Bent, Editor of Energy Focus Magazine
About the Author David Thorpe is community manager of Sustainable Cities Collective, an online community for leaders of major metropolitan areas, urban planning and sustainability professionals. Until 2013 he was for 13 years News Editor of "Energy and Environmental Management" magazine, for which website he also wrote a weekly op-ed column. He is also the author of several books and hundreds of articles on related subjects. Formerly director of publications at the Centre for Alternative Technology, he has written two other books in the Earthscan Expert series, "Sustainable Home Refurbishment" and "Solar Technology," and several B2B ebooks for the publisher DoSustainability. He runs his own sustainable media consultancy, Cyberium, manages the Green Deal Advice website, and blogs regularly as The Low Carbon Kid. Find him on Twitter @DavidKThorpe.
