From Time Inc Home Entertainment : Essential Landscaping before purchasing it in order to gage whether or not it would be worth my time, and all praised Essential Landscaping:

Essential Landscaping is a practical guide to making your property look and live better. A host of experts, led by this Old House landscape contractor Roger Cook, will show you how to beautify your yard with trees, shrubs, and vines, as well as decks, fences, patios, and walkways. Not only will you learn how to create a landscaping plan and choose plants that suite your house and climate, but in Essential Landscaping you'll find one beautifully landscaped yard after another and see exactly how this advice has been put to work. And once you're ready to make changes, you'll have Roger's clear, step-by-step instructions to follow.
