I was already somewhat familiar with it as I am a member and VP of the Freeport Garden Club here on Grand Bahama Island.I wished to know the botanical name of most of my horticulture exhibits to save time prior to entering them into our yearly Standard Show. I have since discovered lots of extra information included which have really enhanced my skill, enthusiasm, and knowledge with plants in general.I have no hesitation in recommending it to interested persons.I understand there is another book that accompanies this under the same name. I am interested in obtaining.Please send info. if available.0 of 0 people found the following review helpful. Five StarsBy CustomerA great book.
