I don't know why someone would say they were looking for something more artistic. The furniture is beautiful. Any little girl, parent or fairy for that matter would love to make or have this furniture. The author makes it easy to do. With so many different ideas. Not only that, you have to take a walk in the woods to gather twigs, acorns, grape vine tendrils, and whatever else you can find on the ground to make the furniture. What a lovely way to spend the day with the family. Getting out to enjoy nature. Then get to plan how you want to build the furniture (fun family project). I would say this book is a gem. I plan to buy one for each of my two granddaughters and two great granddaughters. (even though some of them are not old enough yet to build them). You can find moss in the

dollar store or craft store and dried flowers too or flowers from your yard..The possibilities are endless.This is my first time reviewing anything,even though I have bought several things from .That's how much I enjoyed this book.16 of 16 people found the following review helpful. Not worth the priceBy Monica S.This book shows you how to make a fairy chair, bench and bed. It is WAY too expensive for the few pages and few items that it shows you how to make. I will be returning this book. I cannot justify \$19.99 for this book at all.11 of 11 people found the following review helpful. Fantastic book.By Florida Happy GardenerThis book does a great job of showing what kind of furniture one can make for fairy gardens and also how to make them.

Fairy garden designer and artist Linda Haas shares her step-by-step process of building fairy furniture from twigs and other natural materials. You will be inspired to learn how branches, dried flowers and broken jewelry can become part of a miniature fairy garden accessory. This book also contains other fairy garden craft ideas and is filled with pictures to inspire the fairy garden artist in you. Revised edition.
