Beautiful book embracing a whimsical world of fairies By Barbara Schneider What a beautiful book, quality throughout with gold swirl design on cover and throughout book. Cover and pages are very nice, thick and sturdy, quality, quality, quality. The photos are beautiful. Excellent and impressive as a gift. I stumbled across this while browsing other items and have absolutely fallen in love with fairy houses and fairy gardens. I've abandoned my Victorian dollhouse project to embrace the magical (outdoor) land of fairies. This will become a fun project for my granddaughter and I, because...we believe. This review is coming directly from a builder, collector and lover of fairy houses whose work is not in the book so i'm not biased. <http://fairyhouses.weebly.com/> This book is so comprehensive and includes many photos of different styles of various fairy artists' work. It's not a children's story book, rather a portal for adults like me who love to be swept into magical worlds at the turn of the page. Certainly a treasure I will keep discovering something new in. Thank you! 4 of 4 people found the following review helpful. Beautiful book By Pamela B Kennedy I enjoy crafting and have found this book a treasure trove of inspirational ideas. It's not a how-to book as previous reviews have already noted, but I'm able to recreate some of the vignettes adding my own personal touch by using the book's photos for inspiration.

Many supernatural creatures are said to inhabit our world. Their magical, wonderland realm has been the subject of many books, movies, and our childhood dreams. In this richly illustrated book, 30 designers from around the world

transform natural settings into enchanting displays that recreate that sense of wonder. Using artificial flowers, fabric, sticks, wire, crystals, berries, acorns, baskets, and polymer clay, these designers have been inspired to create their own once upon a time fairy home and garden for special events, storytelling, or just because they believe in fairies. In doing so, they tap into our inner child and help us to imagine a new world. This is a wonderful resource for designers and artists, as well as parents, teachers, or anyone looking to create their own magical place.

About the Author Barbara Purchia, a stained glass artist, is well known for her technical articles, papers, and presentations on software process improvements. Ashley Rooney has established a solid reputation for her architectural, design, and art books.
