Andrew Pearce : Farm and Workshop Welding: Everything You Need to Know to Weld, Cut, and Shape Metal before purchasing it in order to gauge whether or not it would be worth my time, and all praised Farm and Workshop Welding: Everything You Need to Know to Weld, Cut, and Shape Metal:

0 of 0 people found the following review helpful. Lots of information on all type of welding By Markomyt1Wow - What a great book - Lots of information here on all types of welding - Great tips and tricks 0 of 0 people found the following review helpful. A fine book. By Michael Turturici Another learning tool for a home hobbyist. A fine book. 0 of 0 people found the following review helpful. Five Stars By KIMBERLEE HANSON Great

A practical handbook for welding in the farm, home workshop, school workshop, blacksmith shop or auto shop.

From the Back Cover
Your Guide to Successful Welding
Welding is a valuable skill that almost anyone can learn. This comprehensive handbook gets you started with tips and suggestions from an experienced welding instructor. Straight to the point and easy to read, it covers all of the major types of welds, including arc welding, MIG welding, gas welding, TIG welding, plasma cutting, and more. This extremely detailed book is an ideal reference for farm, home workshop, school workshop, blacksmith shop or auto shop. Hundreds of step-by-step photographs illustrate welding processes and show the differences between good welds and bad welds. The author points out common pitfalls and mistakes, and offers constructive advice on how to correct or avoid problems. Whether you are a complete beginner or an experienced welder who wants to learn more, Farm and Workshop Welding provides a wealth of useful shop-tested advice. You'll discover everything you need to know to learn hands-on welding, and start repairing and creating metal equipment and structures. Inside you'll find practical instructions for: - Cast Iron Welding - Pipe Welding - Hardfacing - Soldering - Welding Plastics - Metal Identification - Welding Safety - Workshop Techniques - Drill Sharpening - Taps and Dies - Basic Blacksmithing
About the Author
Andrew Pearce grew up in Kent, England with motorcycles, cars and farm machinery. After study at the University of Nottingham's School of Agriculture, he worked for several years on a farm in Sussex. During this time, he started writing, first for Power Farming and later for Farmer's Weekly. A former instructor of welding and other practical skills, he currently divides his time between writing and the farm workshop.
