Shows how to work with walls, fences, hedges, plant screens, rose arches, pleached trees, trellises, and gateways

.com Fences, hedges, walls, trellises, and screens form the structure around which any garden is framed. Using these elements effectively permits the savvy gardener to "divide and conquer" and creatively highlight certain garden features while masking others, providing shade, privacy, striking visual effects and defining distinct areas of the garden for aesthetic or practical reasons. Richard Bird gives the reader many ideas for projects, including a fruit wall, formal and informal hedges, a picket fence, a rustic trellis, a rose arch, and more than 20 projects that the enthusiastic gardener can duplicate or customize from this elaborately illustrated, lovely handbook of ideas. --Mark A.
