Design ideas for your garden projects By Donald J. Berg Peter Joel Harrison's books are full of accurate drawings of period fences, gates, gazebos, trellises, pavement and garden walls. They are tools for anyone who's restoring an 18th or 19th century home or landscape. They are perfect inspiration for anyone who hopes to infuse some of yesterday's charm

into a new project. Harrison provides a valuable service to architects, designers, preservationists, landscapers and homeowners by researching, recording and presenting the details of historic homes and gardens. I've started using ideas from this book in my designs, and they are better for it. 10 of 11 people found the following review helpful.

Fences: Authentic Details for Design and Restoration By PAT BROWNI am a Landscape Designer interested in historical architecture in the New England Area. The entire series of books by Peter Joel Harrison should be in every designer's library. They are an excellent source for restoration work, and a valuable tool when discussing ideas with clients. Anyone interested in beautiful garden details will be inspired by the wonderful drawings. I purchase the original release of the fence and pavement books several years ago, and I now have copies of the updated issue. Updating to the newer editions is well worth it.

Fences is the first in a series of beautifully-produced books that feature authentic architectural patterns from the two previous centuries. Readers will find a treasury of period fence details-including pickets, pales, piers, and gates-as well as fence ornaments such as finials, caps, balls, and urns. This one-of-a-kind book is the result of the author's 12 years of architectural research and extensive travel documentation.
