Keith S. Delaplane : First Lessons in Beekeeping before purchasing it in order to gauge whether or not it would be worth my time, and all praised First Lessons in Beekeeping:

3 of 3 people found the following review helpful. Plainly written and easy to understand without being dumbed-down By Pecan Corner My bee Mentor told me "This is the only book you need. You can fill a library with bee keeping books, but you don't need any of the others." And he was correct. This contains everything I have needed to know so far for my first months of beekeeping. Plainly written and easy to understand without being dumbed-down, so that the

details I need are in the book.3 of 3 people found the following review helpful. Valuable and insightfulBy KamalaI am a first year beekeeper and I have found this book to be priceless in it's content and simple straight forward explanations that any lay person could understand who can read. If I had one request it would be that the photos were of a better quality. A picture tells a thousand tales. Well the photos here could be improved upon. But overall it's an excellent book and the picture quality would not prevent me from purchasing or recommending the book.0 of 0 people found the following review helpful. One excellent book for beginning bee keepersBy GregA great book for beginning bee keepers. Has a lot of information.

First Lessons in Beekeeping introduces the prospective beekeeper to the basics of beekeeping through easy-to-understand text and numerous color photos on honey bee biology, beekeeping equipment, management, honey production and processing, as well as disease diagnosis and treatment. In the preface to this book, author Keith Delaplane says of his first book on beekeeping, "Its pages opened to me a golden world of honey bees and beekeeping and guided my stumbling steps that first spring season. My story is but one of thousands who have passed through the door opened by Dadant's little book."

About the AuthorKeith S. Delaplane is Professor of Entomology and head of honey bee research and extension lab at the University of Georgia. He has a long association with honey bees, beginning when his father bought him a beginner's kit when he was 13. Dr. Delaplane has authored, co-authored, or edited over 200 publications, including four books, one public television series, and over 30 original research articles. He is a recipient of the Exceptional Service award by the Apiary Inspectors of America; James I. Hambleton Award for Research by the Eastern Apicultural Society; and the D.W. Brooks and Walter B. Hill Awards for Service by the University of Georgia.
