Isabel Zucker : Flowering Shrubs and Small Trees before purchasing it in order to gage whether or not it would be worth my time, and all praised Flowering Shrubs and Small Trees:

0 of 0 people found the following review helpful. Three StarsBy Delbert Mick KyerGood pictures with a good amount of information7 of 7 people found the following review helpful. This is a great reference book esp. for Zones 6-1By customerThis is a good book to have on hand for planning a new garden. The text is well-written, informative and witty. It is not the comprehensive equal of Durr's 'Manual of Woody Landscape Plants,'but it has color pictures and good information for gardens in zone 6 and lower. I believe the author's garden was in zone 6 or 5(?) and the book covers everything she sucessfully grew there. So, if she grew it, it's here. If she didn't grow it, check Durr's book.

Quarto, 1990, PP.287, AN EXTENSIVE CATALOG OF THE POPULAR PLANTS
