It is not written by Duncan Long, but is in fact a copy of a FN manual on the FAL. As such it is copiously illustrated. It covers all aspects of operation, including full disassembly of the entire rifle excepting only the barrel and gas block. It covers variants such as the Para carbine and the FALO automatic rifle as well as its use in launching rifle grenades. Included are an exploded diagram and parts lists. This manual is absolutely essential for every FAL owner.

Complete manual for one of the most effective battle rifles ever made. If you own a FN-FAL you need this book.
Photos drawings on every page
