**Tomas Remiarz : Forest Gardening in Practice: An Illustrated Practical Guide for Homes, Communities and Enterprises** before purchasing it in order to gage whether or not it would be worth my time, and all praised Forest Gardening in Practice: An Illustrated Practical Guide for Homes, Communities and Enterprises:

A forest garden is a place where nature and people meet halfway--between the canopy of trees and the soil underfoot. It doesnt have to look like a forest: whats important is that natural processes are allowed to unfold, to the benefit of plants, people and other creatures. The result is an edible ecosystem. For three decades experimental forest gardens have been planted in temperate cities and rural sites, in households, neighborhoods, community gardens, parks, market gardens and plant nurseries. Forest Gardening In Practice offers an in-depth review of forest gardening with living,

best practice examples. It highlights the four core skills of forest gardeners: ecology, horticulture, design, and cooperation. It is for hobby gardeners, smallholders, community gardeners and landscape professionals. Forest Gardening In Practice features: A history of forest gardening A step-by-step guide to creating your own edible ecosystem 14 in-depth case studies of established forest gardens and edible landscapes in Europe and the U.S. Chapters on integrating animals, learning, enterprises, working in community and public settings

About the Author Tomas Remiarz has been involved in creating and maintaining forest gardens across the UK and Europe for nearly 20 years. He is currently involved in a sustainable rural housing project project on a 7-acre site in Herefordshire. As a founder member of the Permaculture Associations research advisory board he is particularly interested in studying polycultures and has produced several reports on the subject.
