From Tauton Press : Framing Walls (Fine Homebuilding DVD Workshop) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Framing Walls (Fine Homebuilding DVD Workshop):

3 of 3 people found the following review helpful. Excellent video clearly explains the process of framing the walls By MCThe Larry Hahn Tapes take you from the foundation to floor and stair framing, wall framing, and finally the roof. The project is a real house and each detail is carefully described. My type of video If that's not enough, he has a companion book that explains every detail and much more "The Very Efficient Carpenter" 2 of 2 people found the

following review helpful. Watched with my Dad, and he agrees this is a great video!By William E. BaldwinLarry Haun has excellent content. He takes you step by step showing how to build a house. He shows you how to build a window, and what the different parts are called and how they lock into each other. At the end he shows you how to figure stair height, and how to build them.6 of 6 people found the following review helpful. Devil is in the details...By A. StewartAs they say, the devil is in the details and Larry Haun slays the devil. Mike Holmes is good but when you need to know how to do the fine details without taking a semester course in home building Larry's DVDs are great. I know Larry Haun is not a spring chicken but I would really like him to do more "how to videos"...excavating, pouring a concrete foundation, vapour barriers, shingling, siding etc. I would buy them all.

In this wall-framing video, Larry Haun and his brother Joe build the exterior and interior walls of a basic 1,600 square foot house. Starting from the completed floor deck, they take you step-by-step through the entire process, showing you practical ways to organize tasks, streamline procedures and handle the right tools and materials efficiently.

About the AuthorLarry Haun has worked as a carpenter in southern California for four decades and has been a Habitat for Humanity volunteer since the 1980s. He has taught apprentice carpenters at a local community college for more than 20 years. Larry lives in coastal Oregon, where he continues to build houses for Habitat.
