**Edward R. Bosley : Gamble House Aid (Architecture in Detail)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Gamble House Aid (Architecture in Detail):

2 of 2 people found the following review helpful. a nice reference on Craftsman styleBy RobertaThe images remind me of my visit to this place. It's a beautiful house with many thoughtful and surprising features. I bought this as a gift got someone who is building a craftsman-style house, as a style reference. I wish it had more images and larger, more color, images, but it's a good reference.2 of 2 people found the following review helpful. Good details about the Gamble house.By G. CromeansThe book provides good details on the house and a little bit about the furniture. I wish it had more color pictures and more about the furniture.1 of 1 people found the following review helpful. Gamble HouseBy Patricia BergThis book was a gift to others. They are neighbors to the Gamble House in Pasadena and find it a very thoughtful and well put together book and added to their knowledge of this house.The book is represented as "hard cover" but in reality is not, thus one star off.

The Architecture in Detail series comprises books that focus on individual buildings noted for their exceptional character, innovative design or technical virtuosity. Each volume contains a text by a respected author, a sequence of colour and black-and-white photographs and a set of technical drawings and working details.

'The Architecture in Detail series is without question one of the most beautifully illustrated and well-documented collections of monographs on individual buildings produced anywhere in the World.'About the AuthorEdward R

Bosley is Director of the Gamble House. He holds a degree in the History of Art from the University of California at Berkeley, where he studied the work of the Greene brothers first-hand, living for several years in one of their classic, high-period commissions, the W R Thorsen House (1909), a former private residence which now houses students. He is also the author of the definitive monograph *Greene and Greene*, also published by Phaidon.
