There is no mention of it in the book, and the other photos are very uninspired and not informative. Mostly European gardens, and no how to instructions. 1 of 1 people found the following review helpful. Interesting to see these great garden designers at home. By Rodja NZA great read to see how these designers think and how they look upon their own gardens. Nicely presented and recommended to all budding designers of gardens. 0 of 0 people found the following review helpful. Gardens of wanders By Vandella's Views The beautiful photography by leading garden designers offers something for every gardener. This includes an opinion about growing gardens. The book contains photos, names, and species of the gardeners favorite plants, which is a great treat for selecting what, may be added to your own. A favorite I liked was

from the Arabella Lennox Boyds garden at Gresgarth Hall, Lancashire, U.K. on page 121. There are two garden rooms containing pebble designed floors surrounded by grass carpets and large herbaceous plants. The other gardens are just as wonderful to let your eyes wander through and imagine how to create your own garden of design.

A stunning peek at the private gardens of some of the world's most influential designersoften a place for experimentation
