Nick Kollerstrom : Gardening and Planting by the Moon 2014: Higher Yields in Vegetables and Flowers before purchasing it in order to gage whether or not it would be worth my time, and all praised Gardening and Planting by the Moon 2014: Higher Yields in Vegetables and Flowers:

1 of 1 people found the following review helpful. usefulBy Jennifer CornellI get this guide every year, because it is so

rich, to better plan my plantings. I like to consider the moon when gardening0 of 0 people found the following review helpful. Very nice Book, easy to understandBy CatherineI had know that it work, my mom and grand ma allways watch the moon for planting,I just needed a calender to know what day to plant what.

Here we re-learn that the rhythms of the moon affect both crops and livestock. The gardeners at RHS Wisley have proved the benefits of the lunar effect under controlled research conditions. Increased yields of 20% - 30% are routinely touted. You won't have to get up in the middle of the night to sow your carrots!. Country folk know that planning their work in harmony with the rhythms of the moon produces better crops. It's that easy. They get higher yields and better flavour in vegetables. Flowers produce stronger displays and heightened colour. This guide computes everything you need to know about the daily influence of the moon and the planets in the garden. With its full 15-month daily calendar, it creates an essential timetable for the year ahead and fine means of self-discipline for keen gardeners.
