Tonie Jean Fitzgerald : Gardening in the inland Northwest: A guide to growing the best vegetables, berries, grapes, and fruit trees before purchasing it in order to gage whether or not it would be worth my time, and all praised Gardening in the inland Northwest: A guide to growing the best vegetables, berries, grapes, and fruit trees:

5 of 5 people found the following review helpful. Finally a book that addresses gardeners in the Inland Northwest who don't live on the coast.By cimThis book is a must-have if you don't happen to live on the coast. So many books are written for the coastal region which does NOT address those of us in a good portion of the Inland Northwest. The information is presented in an easy to read and understand manner.1 of 1 people found the following review helpful. a great book for our regionBy B. Brownexcellent book with lots of info for our region in the inland north west! So cool, I love it!!!Barb10 of 10 people found the following review helpful. Excellent book, bad Price thoughBy Adele VirtueIf you go to the Washington State University website at pubs.wsu.edu you can order the March 2010 edition of this in spiral bound for \$12.00 plus shipping. I had the library copy of the 2001 and bought the new one and sat and compared them side by side. The new version has less pages mostly due to smaller font and layouts. They also updated the suppliers and a bunch have gone out of business and are no longer listed. The only information I could find in the '01 version that was not in the '10 version was about borer beetles on raspberry plants. I can't see paying this much money for an item that cost \$12.00. If you live near a WSU Extension office you can probably pick one up there and save

shipping. I got mine in Spokane, WA. Good luck gardening. Adele

2001 revised edition, WSU Cooperative Extension. Essential reference work for regional gardeners of any experience level!
