1 of 1 people found the following review helpful. Beautiful Book By M. Painter Beautiful photos! Great book with lots of inspiring photos of the southwest. I love looking through this book and getting gardening aesthetic ideas, even though I don't live in this climate. 1 of 1 people found the following review helpful. seen better. By GlevumGuy. I didn't find this very helpful. The best book I have come across for our hot weather area (zone 9), antelope valley, southern California, is the one put out by Home Depot, 'landscaping 1-2-3'. and it's available on Amazon, but check for your applicable zone as it seems one book no longer covers them all. 2 of 2 people found the following review helpful. Lots of advice but also fab ideas! By AFJ Lots of horticultural advice, but also lots of ideas for layout, design and materials. We just moved to Arizona and it's very different! I bought two books, this one and a more expensive hard back designer book -

I'd say this book is just as good, if not better. Lots of pictures, lots of advice, and lots of ideas that you can easily do yourself.
