BergPeter Joel Harrison provides a valuable service to architects, designers, preservationists, landscapers and homeowners by researching, recording and presenting the details of historic homes and gardens. His books, full of accurate drawings of historic fences, gates, gazebos, trellises, pavement and garden walls, are tools for anyone who's restoring an 18th or 19th century home or landscape and inspiration for anyone who hopes to infuse some of yesterday's charm into a new building. This book presents fascinating garden buildings in all of the styles of America's architectural heritage. If you're looking for a

gazebo or pool house to match your period home, this is the book to start with.0 of 0 people found the following review helpful. Excellent!By TwoodworkMr. Harrison has done a fabulous job capturing historical treasures. If you're looking for scaled drawings you will be sorely disappointed. If you're looking for accurate depictions of historical design from which to create your own measured drawings, this is the book for you! Many elevations.1 of 3 people found the following review helpful. Over PricedBy Paqul E. MartinBoth of the books recently purchased are not worth the price. Gazebos and Trellises was sadly missing detail found in far cheaper books published by Dover Books. Sadly, I will probably not trust again in always representing good value.

This unique visual reference brings together almost 200 beautifully rendered drawings of trellises and gazebos, all based on authentic historic details from field and library research. This is the second in a series meant to address the growing popularity of historical architectural details.
